Hiring Manager

Dear Hiring Manager,

I am writing to express my interest in the Java Developer/Software Developer position at your organization. I have recently completed my Bachelor of Engineering in Computer Science and have built a strong foundation in Java, J2EE, Spring Boot, JDBC, Servlet, JSP, SQL, and Web Technologies.

During my project "*Maid For You – Web Portal*", I gained hands-on experience developing a full-stack application using Spring Boot MVC, JPA, Spring Boot Security, Thymeleaf, MySQL, Redis Cache, and Docker. I worked on secure authentication, OTP verification, CRUD operations, caching optimization, performance testing using JMeter, and containerized deployment. This experience strengthened my back-end development skills and taught me to build scalable and secure applications.

Additionally, my internship at *Let's Grow More* helped me improve modular development, debugging, performance optimization, and teamwork. I contributed to new feature development, performance improvements, and issue resolution, which further enhanced my practical understanding of software development.

As a fresher, I am eager to learn, adapt, and contribute to a dynamic development environment. I am confident that my technical skills, commitment, and enthusiasm make me a strong fit for this role.

Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Aniket Gawande
